

**DECORATIVE GRILLES (DEG) / DECORATIVE REGISTER (DER)**

With high demand for aesthetics these days, more and more customers are enquiring about the decorative grilles.

Flowtech decorative grilles comes in a variety of designs and are commonly used in Majlis, atrium, etc.

Decorative grilles can have vertical or horizontal blades and a damper, if required. Similarly, decorative grilles can have the core and damper as required.

Available in Powdered Coated RAL 9016 as standard. Other powder coated finishes are available as options.

**FILTER GRILLE (FLG)**

A washable aluminium media filter can be added to the return grille to form a filter grille. It is fixed at the back of the grille and can be easily removed. The aluminium filter is 25mm thick.

When combining a filter with a grille, the grille can also be made to open like an ordinary door to give flexibility of access to the filter for cleaning or replacement.

**OPPOSED BLADES DAMPER**

FLOWTECH OBD is fixed to the rear frame of SDR, DDR, FBR, ECR, & PAR models by means of "S" clamp for ease of removal and construction rigidity.

To adjust the OBD opening, turn the adjustment screw available at the front face of the register (Clockwise to Open / Counter Clockwise to Close).
